SKILLS

Languages/Frameworks

- Java (Spring Framework, Hibernate, Swing) | Python | C++ | C | C# | Flutter
- JavaScript (React.js, Node.js) | HTML | CSS

Databases

- MySQL | SQL Server | SQLite | Firebase

RPA

- Low-code | Python (Selenium, RPA Framework)

Tools/Others

- Linux
- Units Tests (JUnit, PyTest, GTest)
- Power BI
- MVC | MVCS | Monoliths| SOLID | Design Patterns | APIs RESTful
- Git | GitHub
- Agile
- Docker, Jenkins

EXPERIENCE

RPA Developer | eztools (April 2022 - September 2023) — **Jundiaí, São Paulo, Brazil (Remote)**

Developer of RPA automations on low-code platforms for websites, emails, and spreadsheets, reducing task execution time by up to 8 hours and increasing team productivity by up to 50%.

- Led individual and collaborative automation projects, delivering solutions aligned with organizational goals;
- Collaborated with stakeholders to identify automation opportunities and enhance analytical efficiency;
- Delivered complex projects within tight deadlines, exceeding quality expectations and driving new sales opportunities for automation solutions.

Undergraduate Researcher | Unicamp (February 2024 - December 2024) — **Limeira, São Paulo, Brazil (Hybrid)**

Developed an interactive web visualization using Python (Plotly, Dash) focused on oil exploration data analysis. The project enhanced the quality and interactivity of analyses, enabling analysts to make decisions up to 50% faster and with greater precision.

- Designed an interactive dashboard for complex data visualization, simplifying data manipulation and exploration for analysts;
- Successfully integrated with specific analytical tools, resulting in richer and more detailed insights;
- Outcome: Improved analytical process efficiency, reducing analysis time and enhancing result quality.

Freelancer | (2023 - now) — **Remote**

Identified opportunities and developed small automation projects using Python and its libraries, such as a notification system for pending insurance subscriptions, which resulted in a 100% increase in client subscriptions, preventing document loss and saving time.

- Identification of automation opportunities;
- Delivered robust development with thorough exception handling and high-quality standards;
- Deployed systems into production tailored to client needs.

Process Automation Consultant | Join4 (April 2025 - May 2025) — **Bauru, São Paulo, Brazil (Remote)**

Development of automations, integrations, APIs and small systems using RPA platforms, Java and JavaScript.

R&D Software Developer | Timpel Medical (June 2025 - now) — **São Paulo, Brazil (Hybrid)**

Development of features, bug fixes, code refactors and scripts for a healthcare-related product. Development of prototypes, simulators and tests in a Linux environment. Documentation of features, behaviors and issues related to cybersecurity. Execution of usability and security tests and software verifications. Development and execution of unit tests. Development and maintenance of Linux-environment scripts.

EDUCATION

Systems' Analysis and Development | Unicamp (2021-2024) — **Limeira, São Paulo, Brazil**

Key Courses: Object-Oriented Programming I and II, Databases I and II, Data Structures I and II, Mobile Programming, Web Programming

GITHUB PROJECTS

- Currency Converter (Java, API Rest)
- Task Manager (Java, SQLite)
- QR Code Generator (Python, TKinter)
- RPA Challenge (Python, Selenium, Pandas)
- Whatsapp Marketing Automation (Python, Pandas, RPA Framework)
- Morse Code Translator (C++, Arduino)
- Data Structures Project for a Clothing Store (C)

LANGUAGES

Portuguese - Native
English - Fluent (Cambridge C1)
Italian - Basic-Intermediate
